

How we use AI at The Priory School

Introduction

Generative artificial intelligence (AI) is a type of technology that can create new content, such as text, images, or videos, by learning from large amounts of information. At The Priory School, we recognise the exciting potential of AI to support students, staff, and school leaders. AI can help personalise learning, reduce administrative tasks, and make teaching more engaging and effective. We are committed to using AI responsibly, ensuring it enhances education while keeping the safety and wellbeing of our students at the heart of everything we do.

Evaluation Process

Before introducing any AI tool, we carefully evaluate it to ensure it is safe, secure, and appropriate for its intended use in our school. This process helps us make informed decisions that protect our students and staff, comply with legal requirements, and support our educational goals.

Current Tools and Usage

We currently use the following AI tools, each selected for the specific benefits they bring to our school community:

- **Copilot:** Helps improve efficiency and personalises the learning experience for both students and teachers by providing tailored support and resources.
- **ChatGPT:** Assists in creating engaging content quickly, allowing teachers to focus more on teaching and students to benefit from enriched learning materials.
- **Canva Magic Studio:** Supports the creation of visually engaging content and presentations, enhancing communication and creativity.
- **SLT AI:** Ensures that the school remains fully compliant with regulations and policies, supporting leadership in maintaining high standards.
- **Grammarly:** Helps improve writing skills by providing real-time feedback and corrections, supporting students and staff in producing clear, accurate written work.

Reassurance and Non-Usage

We want to reassure our community that The Priory School **does not use any AI platforms that support life decisions for individuals**. This means AI is never used for making personal or critical decisions affecting students or staff, ensuring that human judgement and professional expertise remain central to all important decisions.

Contact Information

If you have any questions, comments, or concerns about our use of AI, please do not hesitate to contact the school. We are happy to provide further information and discuss how we are using AI responsibly to support our school community.
